## Project Duration

January, 2017

## Project Overview

Quaser Americas is the U.S division of Quaser Machines Tools a leading international manufacturing company located in Taiwan. Quaser Americas opened a new East Coast showroom and distribution center and asked RSI to manage the receiving and placement of their (5) five showroom machines, ranging from 6 tons to 15 tons each. Three containers were received over a two day period with special rigging required to extract the machines from the containers and place them in their new showroom area.
